

Black Cat Blades produces a complete range of Quality Wear Parts for all OEM brands of earthmoving equipment. Blades and End bits are fabricated using high alloy Boron steels and heat treated to exacting specifications to meet the demanding needs of large earthmoving applications.

High Carbon alloy steel is used to manufacture many Road Maintenance Grader Blades and Snow Plow Blades where lower cost is required. Black Cat HighSpec Alloy steels and strict heat treatment tolerances are used to ensure all Cast Wear Parts are of the highest quality possible.
